

Deployment Portfolio Task 3 (10 Points)

[Start Assignment](#)

- Due 11 Apr by 23:59
- Points 10
- Submitting a file upload
- Attempts 0
- Allowed attempts 2
- Available until 13 Apr at 23:59

Deployment Activity 3

Task 3 Deploy an app to Render cloud platform.

Task 3.1 – Pass

- Create a Render account (<https://render.com>)
- Connect a Git repository (GitHub, GitLab, or Bitbucket) to Render
- Deploy any existing web app (e.g. a static site or sample app) to Render
- Verify the deployment via the public Render URL

Task 3.2 – Credit

Complete task 3.1 and:

- Develop a simple web app (e.g. Python/Flask, Node.js, or PHP)
- Configure environment variables and build/start commands in Render
- Deploy your app to Render via Git push (auto-deploy)
- Suspend or delete the service to demonstrate deactivation

Task 3.3 – High Distinction

Complete task 3.2 and:

- Add a persistent database (e.g. Render PostgreSQL or an external managed DB)
- Develop a data-driven web app that reads/writes to the database
- Deploy the full-stack app (web service + database) to Render
- Demonstrate the live app via its public Render URL with working database functionality

Note: there is no Distinction sub-task for this task

Each task has a marking rubric that includes the minimum requirements needed to achieve the equivalent of Pass, Credit, Distinction, or HD grades (for the task).

To attempt a high grade for a task, students must complete all of the lower level sub-tasks leading up to that level.

Students may choose to attempt high grades for some small tasks but just a pass grade for larger tasks.

The final result for the portfolio will be the sum of the grades for each task.

Submit a report including what you did and screenshots providing evidence of this. The report must include a publicly accessible IP address/URL for verification. Submit the report through the canvas Assignment portal.

The “due dates” in the Canvas Assignment portal are intended to help you pace yourself. Any late deductions identified by Canvas(for deployment tasks) will be included in your final mark. For suggested “due dates” for each task see the unit outline.

Submission Instructions:

Deployment Reports:

For each deployment task, prepare a pdf or rtf document with the following sections:

1. Student details: Student ID, Full name
2. Unit details: Unit code and Name (SWE40006 Software Deployment and Evolution), semester,
3. Due date (for feedback) and submission date
4. Declaration of the task level attempted (P/C/D/HD)
5. A report providing evidence of completion of the various sub-tasks. The evidence can include screen-shots (labelled with captions), pasted text from console windows and description of what you did and any errors/unresolved problems
 - Notes: Where source code and/or script files have been provided DO NOT include these in the report. Binaries (executables) should not be submitted, but evidence of their successful compiling/building/deployment can be included as screen-shots or pasted console
 - Each report must be submitted through Canvas Submission portal before the due date.

The submitted Reports will receive feedback and grades only once. There are no re-submissions/re-assessments.

Note: if you are aiming for level (C/P/D/HD) in a task. You have to work on that level and you can't be changing to submit another level after the due date. It is not acceptable. The feedback will be given on the current level you are aimed for the first time you submit the work by the due date.

Deployment 3 rubric

Criteria	Ratings					Pts
Analysing and investigating	4 Pts High Distinction Analysed and investigated errors on the Render console and described clearly on eradicating all errors	3 Pts Distinction Analysed and investigated errors on the Render console and has a short brief on eradicating errors.	2 Pts Credit Analysed and investigated errors on the Render console but did not have enough explanations.	1 Pts Pass Analysed a few errors but did not investigate errors on the Render console.	0 Pts No marks No evidence provided for criterion	4 pts
Source Coding and brief explanation	4 Pts High Distinction An ability to provide deployment outcomes successfully with a brief explanation of coding/scripts, and Deploy a full-stack data-driven web app (web service + database) to Render (add Screen Shots from Render)	3 Pts Distinction An ability to provide deployment outcomes successfully with coding/scripts, and Deploy the full-stack app to Render (add Screen Shots from Render)	2 Pts Credit An ability to provide deployment outcomes successfully with 1-2 errors in coding/scripts, and Deploy your app to Render via auto-deploy and demonstrate deactivation (add Screenshots from Render)	1 Pts Pass An ability to provide deployment outcomes with few errors in coding/scripts. Deploy any existing app to the Render cloud (add Screen Shots from Render)	0 Pts No marks No evidence provided for criterion	4 pts
Quality, Report writing skills, Spelling and grammar	1 Pts High Distinction Written report with no spelling, grammar errors throughout the text and has better	0.75 Pts Distinction Written report with no spelling, grammar errors throughout the text with good quality content.	0.5 Pts Credit Written report with minor spelling and grammar errors throughout the text.	0.25 Pts Pass Written report with major spelling and grammar errors throughout the text.	0 Pts No marks No evidence provided for criterion	1 pts

Criteria	Ratings					Pts
	quality content.					
Quality in Report structure (appropriate Headings/sub-headings)	1 Pts High Distinction Ability to provide report structure in an appropriate form and proper explanations	0.75 Pts Distinction Ability to provide report structure in an appropriate form with few explanations	0.5 Pts Credit Ability to provide report structure in an appropriate form	0.25 Pts Pass Does not has an ability to provide report structure in an appropriate form	0 Pts No marks No evidence provided for criterion	1 pts
Total points: 10
